**infoLock Technologies Achieves**  
**Symantec Data Loss Prevention (DLP) Specialization**

Arlington, Virginia (January 21, 2010)—Today, leading data lifecycle security firm infoLock Technologies (ILT) announced it has achieved Symantec's Data Loss Prevention (DLP) Specialization. Symantec's DLP Specialization is designed to recognize and reward partners, and membership is limited to those partners who have demonstrated DLP expertise. With its participation in the DLP Specialization, ILT will receive access to a range of exclusive benefits.

As an early pioneer in the field of data loss prevention, infoLock Technologies has helped organizations across all industry verticals secure their sensitive data. With additional CISSP (Certified Information Systems Security Professional) and CISA (Certified Information Systems Auditor) accreditation, ILT's security consultants provide a rare blend of technical knowledge and practical experience.

"The DLP Specialization was designed to recognize partners' investment in Symantec and reward their expertise in the DLP market," said Rob Greer, Senior Director, DLP Product Management for Symantec. "With data loss prevention at the core of its practice, infoLock Technologies has achieved the DLP Specialization through its demonstrated expertise in delivering solutions to help our joint customers effectively discover, monitor, and protect their confidential data wherever it is stored or used."

"We are very pleased to be a Symantec DLP Specialized Partner," said Sean Steele, co-founder and CEO of infoLock Technologies. "Symantec is an industry leader in DLP services and products and its commitment to innovation and customer satisfaction blends perfectly with our own."

About infoLock Technologies

infoLock Technologies (ILT) is a recognized leader in data lifecycle security. Combining technical expertise with business savvy, ILT provides a range of solutions to help its customers—from financial services companies to healthcare organizations to government agencies—secure their sensitive data. Clients include the U.S. Navy, Sharp Electronics, Highmark Blue Cross Blue Shield, Education Management Corporation, and the North Carolina Department of Health & Human Services. Founded in 2005, ILT is a privately-owned company headquartered in Arlington, Virginia. For more information, visit <http://www.infolocktech.com>.
